

Maximum Depth of binary tree

```
class Solution {
public:
    int maxDepth(TreeNode* root) {
        if (root == nullptr) return 0;

        int left = 1 + maxDepth(root->left);

        int right = 1 + maxDepth(root->right);

        return max(left, right);
    }
};
```
